

**English:**

The children are going to work on writing their leaflets this week. They have learned about the features of a leaflet and are going to be trying to write it so that it looks authentic!

**Maths:**

The children are going to be learning about volume and capacity next week. In order to make their learning more meaningful, please could you allow your child to select a small container from home (no larger than a shoe box size please!) that they can bring in and use for their Maths lesson on Wednesday 27<sup>th</sup> March.

Please ensure it has a name label if you would like it back!

**Mathletics homework**

Just a reminder that this week the children should log in to Mathletics and complete the assigned activities - Everyday Mass and Everyday Length. Please be aware that we have just started a unit on measures and that children may need a little more of your support than usual to complete this activity.

Any questions or technical issues - please let us know!

**Multicultural Week Reminder**

Thank you to those parents who have approached us about visiting the children to talk about your country of origin/lend us stories from other parts of the world!

We do still have space in the week for further visitors if anyone else would like to pay us a ten minute visit to share pictures/experiences/traditions from other countries. Please come and let us know if you are interested!

Have a great weekend!

Love, The Year One Team
