

Week Beginning 13.5.19

This week:

We have been keeping a close eye on our class caterpillars this week and we have seen many changes happening! The children have been commenting on how big the caterpillars have become, and some of them have even formed their cocoons!

In our phonics lessons, we have recapped the diagraph 'ee' with the poem, action and sound. We have been learnt about more words with the silent letter 'e' at the end i.e. 'have, solve, halve etc. and learnt our new rainbow word 'his'.

For our maths lessons, we have been continuing with our doubling, halving and sharing and the children have been helping us to solve problems for the doubles magician and the creatures in the magical forest

The children have been listening to the book 'Recipe For a Story' and using all the fantastic information from the book the children have come up with their own ideas! We have been mixing all the ideas together and we are all excited to see what stories we will make.

Next week:

The children will be continuing to help us with our doubling, halving and sharing problems and we will be using our ideas to make our very own stories!

Bug challenge:

Why don't you set up a picnic at home and see if you can equally share the food between whoever you've invited!
