

English:

Next week we are going to be writing letters from fairy tale characters. Please continue to share lots of fairy tales at home and discuss their personality traits as well as how they are described physically.

Maths:

We are moving on to money next week. The children need to understand that each coin has its own value, and that we use combinations of coins to create certain amounts.

Also important to note that there are lots of numbers that do not have a coin of that value!

Mathletics homework

From now until the end of term - as there are only a few weeks left! - we would like to give the children free access to Mathletics to revise any topic they (and you) feel is useful to them.

We will continue to inform you of the maths learning coming up in the box above so you can steer your child towards activities relevant to this if you wish.

Windsor volunteers

If you have been asked to join us on our school trip, please be aware that there will be a meeting for volunteers, date to be confirmed, before we go.

There will also be a Google form for you to complete about your details - keep an eye on those emails!

Have a great weekend!

Love, The Year One Team
