

Week Beginning 21.10.2019

This week we have been.....

We have moved on to learning our new letters and their sounds (n, ch, s, ee). The children have had lots of fun reading the letters, saying the sounds and doing fun activities to help them remember them. We have even introduced two digraphs (two letters that make one sound) this week!

In Maths we have been practising "careful counting" making sure that we count each object only once, that we say numbers in the correct order and that we remember that the last number we say when counting is how many we have in the set. We also explored the different ways we can make amounts e.g. 2 and 3 makes 5

We read the book "Christopher Pumpkin" by Sue Hendra. The children answered questions about the story and we enjoyed making our own pumpkins, giving them names just like in the story.

We learnt about how to stay healthy and safe when cooking. We also practised following instructions to make our own pizzas. The children did a brilliant job!

Coming up after Half Term....

It's science week in Reception. We are going to be talking about what science is and what scientists do. Linking to the children's interests we will be looking at fireworks, rockets and space. The children will have the opportunity to become scientists themselves making observations, asking questions and testing ideas.

We will also be introducing our next sounds; m, ar, e, c, k and investigating 2D shapes.

Bug Challenge.....

Enjoy sharing your first school reading book with your grown-up and talking about the story. Can you spot any letters we have learnt in school?

Practise writing your name as much as you can. Have you remembered all the letters? Remember only the first letter in your name is a capital.
