

10/02/17

Hello!

Wow, what an amazing International Week! We have had so much fun travelling around Europe looking at many different countries and learning lots about each place.

After the half term break we will be looking at...

English We will be looking at non-fiction resources with a particular focus on leaflets. All this learning will be applied at the end of the week when the children will be writing their own leaflet on everyday materials.

Maths We will be focusing on length and height. To start with we will be comparing objects before moving onto measuring items using a ruler. The language we will be encouraging the children to use includes: longer, shorter, taller, tallest, half and double.

Topic We will be looking at Isambard Kingdom Brunel. We will be learning why he is an important historical figure and the important events from his life. This will be leading up to planning and designing our own bridges next week.

Helpful hints

Try this link to drag and drop animals into the correct order of size.

Don't forget Mathletics!

We have opened up some more areas for you to look at 😊

If, over the break you find any leaflets, could your child bring them in for everyone to explore?

Love

The Year 1 Team
