

## English:

The children have continued to look at poetry and have learnt some poetry off by heart and have performed some to their peers. The children have also been practising dictation and writing down sentences as their teacher says them. They have also been marking and editing their own work, we have lots of budding teachers!

Poem of the Week

## Maths:

This week we have been learning a new way to add two numbers. The children have been using the column addition method and have learnt how to do this when the units bridge 10. The children have enjoyed learning a new way of adding to add to their other strategies and it has really helped them to cement their knowledge of partitioning.

Please continue to hear your child read every day and ask them questions about what they have read to encourage their comprehension skills.

Please practise telling the time with the children at home to solidify this important life skill. Remember, the clocks go forward this Saturday night!

Bug Club and Mathletics are helping the children immensely, please continue to log on and have fun.

## Science

As our topic of 'Staying Healthy' continues we have been focussing on the effect of exercise and the affect it has on our bodies. We have engaged in lots of physical activity and have analysed the results afterwards. The children have been applying this knowledge during playtime and lunchtime and have written out a daily plan of their exercise in an

average week.

Thank you for your continued support.

Love, The Year Two Team
