

16/6/2017

This week...

It has been hot, hot, hot this week in Reception so we have been talking about ways to stay safe in the warmer weather. Thank you so much for sending your children in with hats, water bottles and sun cream. We have enjoyed lots of water play to stay cool and continued without butterfly stories. We were also very excited to discover that our butterflies had appeared from their chrysalis'. We talked about where the best place to release our butterflies would be and why.

We have also learnt about instructions this week and have enjoyed programming the Beebots to follow different paths.

Coming up next week

Sports Day is coming up on Wednesday afternoon and we will be practising our events. In response to the children's interests we are going to be introducing our minibeast topic. We will be reading minibeast stories, learning minibeast songs, looking for minibeasts in our environment and learning more about our favourite minibeasts. In Maths we will be solving problems involving counting in 2s, 5s and 10.

Bug Challenge

(Just for fun and if you have time)

What is your favourite minibeast? Can you find out some facts about your favourite minibeast?
