

## Week Beginning 26.3.2018

### **This week ...**

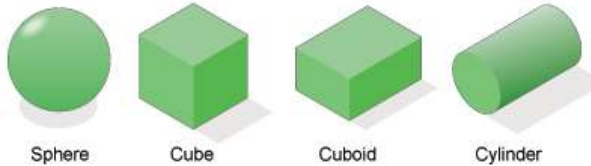

We have had to say goodbye to our lovely duckling friends! The children have had the opportunity to watch them grow and change over the last couple of weeks and even watched them have their first swim!

We have learnt duck facts this week such as why they have webbed feet and how long until ducklings become adult ducks. We have used eggs to practise our addition and subtraction knowledge and independently written a sentence about the ducklings without any help! The children's beautiful writing continues to wow us!

### **Coming up next week....**

We will be looking at a selection of 3D shapes and introducing the names. We will discuss Easter and why some groups of people celebrate at this time of year. We

will be getting creative with clay, making our own Easter baskets. We would also love to do some cooking next week making chocolate Easter nests...yum!

### **Bug Challenge.....**

Can you spot any signs of spring? Daffodils? Temperatures rising? Leaves on trees? Baby animals? We would love you to share what you find on tapestry!

Have a wonderful weekend!
