

**English:**

More and more dinosaurs. This week we moved on to using the present tense to explain what is happening at each stage of a fossil being formed. We then looked at the difference between present tense and past tense, and at when we can use them to help.

**Maths:**

We have continued to use scales and used the scales on rulers to measure and draw lengths using the correct units. Right turn, left turn, clockwise, anti-clockwise, half turn and quarter turns then filled up the rest of the week to help us give directions and finding things

**Topic:**

Our current topic is all about the world. We have looked at continents, countries, hemispheres, climate zones, weather, different animals and their habitats and how they differ.

Over the next two weeks we are intending to explore food types and dips. Can we ask that you can make sure our records are up to date for any food allergies, food intolerances or religious dietary requirements.

Please remember water bottles in this warm weather.

Love, The Year Two Team
